

## BMW24F

### 2.4 Meter Whip Antenna for Jaguar VHF Manpack

The BMW24F is a rugged and robust sectional whip antenna, designed for use on Jaguar VHF man-portable transceivers.

The BMW24F is vertically polarized and omnidirectional and the fitted gooseneck allows the antenna to be bent vertically irrespective of radio position.

The radiating elements are corrosion resistant and linked with an elasticated cord for rapid assembly.

Typical erection time is 5-10 seconds.

#### Features

- Compact and lightweight
- Quick and easy to erect
- Customized spigot for most transceivers.
- Rugged and durable
- Tie strap supplied
